

International - Polymer Consultant Directory

Plastics, Rubber, Composites, Polyurethane, Adhesives, Additives

Serving the Polymer Industry since 1985

Richard Bladon:	Health and safety for plastics processors
Eric Boinard:	Value added consumer-centred innovation within a regulatory framework
John Bovis:	Polymer product consultant, design/development to production-cell, lightweight, process, tool & energy optimisation
Scott Brannan:	Cost estimating to set targets and reduce costs
Graham Chetwood:	Cost reduction from improved purchasing
Christophe Convert:	Concept to reality
Terence Cooper:	Bioplastics, sustainable packaging, recycling & recovery
Peter Cracknell:	High-quality on-site polymer training & consultancy services
Gerhard Crossman:	Turnaround & process improvements, change management
John Duncan:	Thermal, dynamic mechanical & dielectric analysis
Jesús Fernández:	Energy efficiency improvement and sustainability management
Sarah Greenwood:	Packaging
Trevor Hutley:	Global polymer industry consultant, Research & Innovation advisor
Ashley Jones:	Growing businesses by developing leaders, transforming teams and delivering sustainable performance in manufacturing & commercial functions
Andy Jewell:	Industry 4.0 - Cloud MES, ERP & IoT (Digital Manufacturing) specialist
Robin Kent:	Energy surveys & energy management, sustainability management
Nicolas Kokel:	Strategic business opportunities, processing, converting and applications, recycling and sustainability
Brian Lodge:	Sustainable packaging design, assessment, and training
Pravin S Mistry:	Global: mergers & acquisitions, buying / selling companies, recruitment, chair roles, polymer consultancy
Jeremy Pingstone:	Injection moulding. Education, skills & apprenticeships
Eric Reddock:	Composites and reinforced polymers expertise
Fabrizio Rizzato/Petra Mickova:	Thermoset polyurethanes from chemistry to equipment
Colin Sarson:	Helping companies grow, maximise profits and develop their work force
Eddie Sheridan:	Market research, materials, packaging & improvement
John Taylor:	All aspects of extrusion technology from materials to machinery

Why use pcn?

Established in 1988, the Plastics Consultancy Network has been serving the global polymer industry for over 30 years.

The PCN is a professional network of the best independent plastics, polyurethanes, rubber, composites and adhesives consultants in the world.

PCN members are not only located around the world but also work around the world.

Every PCN Consultant is an independent, highly qualified, and experienced polymer consultant considered an expert in their field. All PCN members have a proven track record in polymer consultancy and can bring decades of experience to your company, at a fraction of the cost of hiring internal resources.

In times of trading be it difficult/demanding conditions, improving efficiency, increasing margins, and reducing downtime are more vital than ever. PCN's focus on the polymer sector involves sharing the knowledge and information generated from many years of experience in all areas of the polymer businesses.

PCN's commitment is to help clients find effective solutions, actively, quickly, creatively, and at a minimal cost. Selecting a PCN member consultant guarantees a professional response to a professional need.

The PCN - for all you need to know about plastics, polyurethanes, rubber, composites and adhesives, from the experts.

Richard Bladon & Associates Ltd.

Specialities

Rubber, Thermoplastics, Health and safety, Recycling and recovery, Sustainability management, Waste management, Legislative and regulatory, Automotive, Food, General, Training (incl. online), Fire safety management, Environmental management systems, Health & safety management systems, PPC permits, ISO14001 EMS implementation, ISO45001 OH&SM implementation, Training (Health & Safety, Environmental & Fire), Fire management.

Our services include:

Implementing and running Health & Safety/Environmental Management systems in accordance with ISO 45001 & ISO 14001. We have extensive experience in Accident Investigation, Policy writing, Fire Risk Management including Policy, Fire Risk Assessment, Training, Risk Assessments, COSHH Assessments, Compliance Audits, Occupational Health Review, Gap Analysis against ISO standard 45001 & 14001, Support on PPC Permit Applications, Waste Management Reviews, Emergency Procedures, Sustainability and waste recycling.

For almost 3 decades, Richard Bladon and Associates have worked in the plastics industry from processing to health, safety and environmental management covering Nordics, UK, Eire & South Africa with a large German Plastics Processes. Richard is a Chartered Member of IOSH (CMIOSH), Practitioner of IEMA (PIEMA) and an Associate of the Institute of Fire Protection Officers (AMIFPO).

He is the Chair of the BPF Industrial Health & Safety Committee, IOSH North Wales Committee and IEMA North Wales Steering Group.

Our clients include:

national fire companies, automotive OEM suppliers, waste disposal & waste recycling companies and water treatment companies.

6 Netherby Drive, Glasgow G41 5JA,
Scotland, UK

john@pi360.co.uk

www.wwww.pi360.co.uk

Specialities

Product design and evaluation, Materials selection, Thermoplastics, Analysis, Additives, Injection moulding, Thermoforming, Tooling, Equipment, Health and safety, Quality, Eco-product design, Energy management, Automotive products, Electrical/electronic products, General products, Medical products, Packaging, Project management, Trouble shooting.

Our services include:

UK Agent for Safoam (Endo- thermic blowing agents) from USA, Moldex 3D Analysis - with Foam analysis modules, Design for Manufacture (DFM), Tooling - (GA) evaluation and optimisation, Tool specification, Manufacturing cell development, Bespoke material development (Via subcontract compounder), Injection moulding (process optimisation, energy evaluation and optimisation and lightweighting), Tool evaluation/development advice, Equipment specification, Energy monitoring, Energy optimisation, Real time production monitoring (subcontract), Making Lean Sustainable (sub-contract), Estimation of bottom-line savings for lightweighting developments, New product costing, Defence products, Marine products, Toolmaker selection, Tooling supply, Automation Existing tool evaluation/analysis, Tool re-development advice, planning and project management, ISO 14971 Risk assessment, DFMEA /PFMEA.

Over the 40 years I have worked in the Polymer industry, I've had the privilege of working with many great people across much of the world. My rolls were as diverse as Technician to Technical Manager, and in application, from R&D through to specifying and project managing production cells to make 30-50 million parts per annum.

In all the different applications and intriguing challenges, the thing that keeps it interesting is getting to the root cause of problems and creating innovative solutions, raising the customer and their products to new capabilities.

Specialities

Materials selection, Product design and evaluation, Rubber, Thermoplastics, Equipment, Injection moulding, Thermoforming, Automotive, Electrical/electronic, General products, Medical products.

Our services include:

Design for manufacture, Electronics & electromechanical, Machining, Sintered metals, Sustainable procurement, Cost Estimation, Supplier negotiation, Quotation evaluation, Procurement, EV batteries & Motors, Aerospace, Marine, Value stream mapping and Process improvement.

Scott has extensive experience in the field of cost estimation understanding both supplier and end user cost structures. As a company Scottbrannan Ltd has developed a costing system with a vast database of 1700 machine types, 2000 materials and coverage for 90 world regions. This system is improved and updated as a continuous process. This system has successfully been used since 2014 with significant success in managing cost.

Clients include:

Dyson EV, Aston Martin UK, LEVC (Formerly London Taxi) UK, Northvolt AB Sweden, Yasa EV motors UK, Freyr Norway Omimod Norway, Skeleton Technologies Estonia, Saietta Motors UK, Jaguar Landrover UK, Sharing in Growth part of a Rolls Royce project.

Specialities

Materials selection, Product design and evaluation, Rubber, Thermoplastics, Blow moulding, Extrusion, Injection moulding, Quality, Thermoforming, Tooling, Market research, Automotive, Electrical/electronic, Project management, Trouble shooting.

Our services include:

Design Engineering, Product Design, Product to market, CAD, Design for manufacture, Design for cost, Cost saving (VA/VE), Supplier management, RFQs, QAFs, Oil & Gas Products, Marine powertrain products and PLM (Teamcenter).

Convert Design offer services throughout the design lifecycle to bring your idea or concept to reality while meeting your individual requirements.

Our services range from CAD modelling using Siemens NX to Project Management, Quality Support, Supplier Research, Manufacturing Advice, Prototyping Support and many more. We can help you bring your idea to life.

All of the Intellectual property created by Convert Design will stay with you, and all communication or sharing is done under a non-disclosure agreement signed from the first enquiry between both parties. We can also offer Cost Estimation services of the design through our collaboration with Scott Brannan. From the start of the design, even before we start manufacturing, we know the finished will be optimized for manufacture and piece price, so you get the best of both worlds.

Specialities

Materials & formulation, Applications & markets, Compounding, Environment & sustainability, Biobased, Renewable, (Bio)degradable, Compostable & Water soluble plastics, Functional polymers/blends, Sustainable Packaging, Recycling and Recovery. ARGO Group is a global polymer consultancy providing specialized services in chemical and polymer science, materials technology and market and applications development in North America, Europe, Japan and other international markets.

We provide services globally in the following areas:

- New product, process, market and applications development in bioplastics (biobased, renewable, biodegradable and compostable) and water-soluble plastics.
- Polymer and plastics formulation, compound and process development.
- Development of biofuels, biobased and renewable chemicals, monomers and plastics.
- Packaging technology, package design and use, environmental issues and sustainability.
- Recycling and recovery technology and end-of-cycle processes (waste-to-energy, fuels, monomers and downstream chemicals).
- Strategic market analysis and research, development and technology portfolio evaluation.

Specialities

Materials, Tooling, Expert Witness, Troubleshooting, Training.

PSC Associates is a leading online training company, delivering polymer engineering degree modules in Plastic Materials and Plastic Part Design for a number of universities and companies worldwide.

Our services include:

- Onsite Plastic Materials Training, including: Commodity, Engineering and High Performance Plastics. Plastic injection mould design and plastic part design courses.
- Assessment of training requirement, design and delivery of bespoke onsite short courses within the UK and overseas.
- Consultancy and Troubleshooting on Injection Moulding, Vacuum Forming, Processing/Tooling and Plastics Materials Selection.
- Expert Witness reporting on Mould Tooling, Plastic Part Design and Plastic Materials selection.

Many years of experience working in the polymer Automotive, Medical, Aerospace and Packaging sectors.

ddewetroos@mweb.co.za

www.industrialchemistryconsulting.com

LinkedIn.com/in/deon-de-wet-roos-092a451b3

Specialities

Additives, Analysis, Polyurethanes, Product design and evaluation, Extrusion, Injection moulding, Bioplastics, Eco-product design, Plastics degradation, Recycling and recovery, Market research, Authoring, Project management, Training (including online), Troubleshooting, Product development and innovation, Process optimisation, Alternative biobased raw materials, Polymer Chemistry and Synthesis, Technical and Scientific Computer Modelling, Stage Gate Process for R&D Project Evaluation, Statistical data Analysis and Experimental Design.

Our services include:

Comprehensive product development and innovation strategies tailored to client needs. Expert consultancy in process optimisation and troubleshooting for polymer and chemical processes. Market research and preparation of detailed reports, including market potential, operational analysis. Development and evaluation of sustainable and eco-friendly products. Customised training programs, including online options, covering various aspects of polymer science and industrial chemistry. Assistance with recycling, recovery processes, and strategies for waste reduction. Application of advanced statistical methods and experimental design for process improvement. Financial evaluation and strategic planning through the Stage-Gate process for R&D projects. Technical support for extrusion, injection moulding, and bioplastics formulation. Authoring of technical documents, safety data sheets. Integration of alternative biobased raw materials into existing production systems. Implementation of advanced computer modelling for predictive analysis and optimisation.

I have more than 24 years of experience in chemical synthesis, polymer science, product development, and project management. I have an extensive track record of leading multidisciplinary teams, mentoring professionals, and successfully driving large-scale technical projects across diverse industries such as resins, adhesives, surfactants, polyurethanes, and industrial coatings.

Lacerta Technology Ltd. 80 Hathern Road, Shepshed,
Leicestershire, LE12 9GX, UK

-  +44 (0) 1509 828 890
-  john.duncan@lacerta-technology.com
-  www.lacerta-analytical.com

Specialities

Analysis, Materials, Testing, Training, Instrument servicing.

Lacerta Technology offers Contract Research for assistance and advice on materials' development and characterisation of mechanical and thermal properties over a wide temperature range and in controlled environments, for example air, nitrogen, fluid immersion and varying relative humidity. Dynamic mechanical and dielectric analysis are particularly sensitive to changes in polymeric structure in the solid state, for example with blends, the effect of cooling rate and the degree of cure for thermoset resins. Detailed analysis can assist in the optimisation of processing conditions. Contract thermal analysis work, using the following techniques: DSC, DMA & DETA and the novel identiPol QA, specifically designed for Quality Assurance in the plastics' industry. Our reputation is well known in the field of Thermal Analysis.

- Test method development.
- Practical use temperatures.
- Studies of blended materials.
- Degree of cure studies.
- Composite materials measurement.
- Deformation mechanisms in plastics.

Specialities

Injection, Extrusion, Thermoforming, Secondary Processes, Energy Efficiency workshops and energy management, new technologies. Sustainability and Carbon Footprinting. Training & Project management.

Axis Technology operates worldwide for plastics processors, providing the following services:

- Energy efficiency surveys/workshops.
- Technical validations.
- Energy management training (in-house and on-line).
- Due diligence processes.
- Compressed air & gas leak measurement.
- General sustainability assessment.
- Carbon footprint for organizations and products.
- Water management.
- Sustainability in-house training.

We have a proven track in the plastics world providing services to reduce energy consumption, increase profitability and make 'cleaner' operations.

Sarah Greenwood Packaging, BBIC, Innovation Way,
Barnsley, S75 1JL, UK

+44 (0) 7826 791 045

+44 (0) 7767 576 911

ashley.keyconsultancy@outlook.com

pcn.org/our-members/member-ashley-jones/

Specialities

Ashley is a dynamic and trusted operations leader with over 40 years of experience driving transformation and growth within the plastics packaging industry, supporting both Corporate and Private Equity-backed organisations.

Educated in Production and Mechanical Engineering at the Polytechnic of Wales (now University of Glamorgan) through the prestigious Metal Box Graduate Scheme, Ashley developed a strong technical foundation complemented by the discipline and resilience gained as an international competitor in rugby and karate.

His career spans leadership roles across injection moulding, blow moulding, sheet extrusion, thermoforming, and blown film technologies, delivering high-performance solutions to major FMCG clients throughout the UK, Europe, and Asia.

Renowned for turning around underperforming operations, Ashley combines strategic thinking with hands-on leadership to deliver measurable, lasting results. Whether brought in as an interim leader or consultant, he excels in navigating difficult situations - from site underperformance and cultural misalignment to stalled growth and operational inefficiencies. His calm, focused approach provides clarity in complex scenarios, earning the trust of stakeholders at every level.

Ashley's true passion lies in developing people. He has coached and mentored technical managers into confident, commercially aware leaders, while aligning multi-functional teams behind shared goals and a culture of continuous improvement.

Clients value his straightforward, empathetic leadership style - one that builds trust quickly, drives accountability, and creates the right conditions for lasting success. If you're looking for a seasoned consultant who can lead through complexity, elevate operational performance, and develop leadership capability - Ashley brings the experience, credibility, and commitment to deliver real impact.

Tangram Technology Ltd., 33 Gaping Lane, Hitchin,

Specialities

Materials, Injection moulding, Extrusion, Environmental, Energy surveys and energy management for plastics processors, Carbon footprinting for plastics processors and products, Cost management for plastics processors, Quality management for plastics processors, Building products, Authoring, Training, Project management. Tangram is a leading international consultancy for energy and sustainability management in plastics processing.

We provide the following services:

- Energy surveys for plastics processors.
- Energy management training for plastics processors.
- Sustainability management for plastics processors.
- Technical authoring services.
- Quality management for plastics processors.
- Cost management for plastics processors.

We are experts in reducing energy use in plastics processing and work with large international processors on corporate programmes to reduce energy use, save money and improve the carbon footprint of operations.

Dr. Nicolas Kokel

KONIMEC FZ-LLC, SFFO0827, Compass Building, Al Shohada Road,

Specialities

We provide services to plastic processors and users of plastic items in the downstream sectors:

- Market intelligence, identification of business opportunities
- New product and application development
- Factory and laboratory design
- Plant performance optimisation
- Deployment of Industry 4.0 & IIoT technologies
- Extrusion and converting equipment selection
- Equipment upgrading and retrofitting
- Formulation of plastic recipes
- Extrusion process improvement and troubleshooting
- Plastic product quality and performance improvement
- Strategic advice on sustainability, environmental policy, and recycling
- Strong focus on films and packaging applications

+44 (0) 7485 598 650
brian@lodge-consulting.com
pcn.org/our-members/brian-lodge/

Specialities

Product design and evaluation, Blow moulding, Injection moulding, Thermoforming, Eco-product design, Energy management, Recycling and recovery, Sustainability management, Market research, General markets, Packaging, Project management, Training (incl. online), Design for the circular economy, Design for recyclability, Design productivity, Packaging assessment and evaluation, Product development workshops, Packaging Legislation.

Brian is an experienced design and development professional who works in the plastics industry, mainly, but not exclusively, with packaging. His core skills are design and development, and he has considerable experience in sustainability and design for the circular economy.

We provide the following services:

- Designing new products, design for efficiency, incorporating recycled content, design for recyclability, sustainable design.
- Assessing existing ranges to create more sustainable products, building development strategies, reviewing recyclability.
- Workshops and training on sustainability, recyclability, the effects of impending legislation, and design productivity for the packaging industry.

Our main interests are in helping industry improve the sustainability of their products through design, lightweighting, incorporating recycled content, and design for recyclability. Brian is currently chair of the RECOUP Recyclability by design committee and the WRAP Jazz polyolefins committee, as well as sitting on the OPRL Technical Advisory Committee. He is also a past joint chair of the Recyclclass Advisory committee, the PCEP Innovation committee, and two committees of the CPA. Alongside working as an independent consultant, Brian also works part time for the British Plastics Federation, where he is the Director of Plastics and Flexible Packaging where part of his role is to work with government and civil servants on the latest legislation facing the packaging industry.

Specialities

prea[®] Ltd is an internationally-renowned one-stop shop for the polymer industry, with over 30 years of experience. We are based in Manchester, UK and have offices globally to support our international customers with the following services:

- prea[®] Capital Mergers & Acquisitions Buying and Selling Companies Cross Border Deals
- International Recruitment
- Polymer Consultancy
- Buying and Selling Machinery

prea[®] Capital International Mergers & Acquisitions and the Buying and Selling of Companies in a variety of sectors, working with Strategic and Private Investors.

COMPANIES FOR SALE & WANTED

We have clients that are looking to buy and clients that are looking to sell Manufacturing and Distribution companies. These can be any size or location: Plastic Compounding, Masterbatch/Concentrate, Compounding, Injection Moulding, Extrusion Thermoforming, Dip Moulding... These can be Plastics, Rubber, Composites, Adhesives, Engineering.

- Purchasing and Disposal of Business Units / Carve-outs / Divestiture
- Preparing Companies for Sale
- Due Diligence – Pre/During/Post Acquisition
- Creating Portfolios – Diverse
- Management Buyouts and providing funding
- Joint Ventures and Collaborations
- Financial Investment / Funding
- Recruitment – Permanent / Interim, from Managerial to C Level
- Land / Buildings – Buy Back and Lease
- Business Turnarounds
- Businesses in Distress
- Chapter 11 / Insolvency
- Exit Strategies – both for institutions and individual owner-managed companies

International Recruitment – Permanent, Interim and Contract

We have extensive connections globally with a broad base of employers and have a continual pipeline of candidates from our global offices.

C level – CEO, MD, CFO, COO, Chair and Managerial – Technical, Commercial, Technical Sales, Operational, Production, Purchasing, Quality or HSE.

Polymer Technical Consultancy

Experts in Plastics, Rubber, Composites, Adhesives, Polyurethanes, Paints, Textiles, from Formulations, Processing and Technical Service

Machinery

We can source new and used machinery and purchase machinery from individual machines to single or multiple sites.

Contact us today for a confidential discussion on how we can assist your business

Specialities

Fibre reinforced plastics (Composites), materials selection, testing, qualification & specification, product design, product manufacture, product testing (NDT and destructive), project management.

- Reddock Consultancies is a global polymer consultancy at the forefront and a leader in all aspects of polymer science and engineering technology
- We have over 30 years' experience specialising in and supporting "Composites" in the aerospace, automotive, naval and general engineering sectors
- We also consult on both engineering thermoplastics such as PEEK and commodity thermoplastic such as polyethylene.
- We consult to both highly regulated and low technology industries.
- We consult on material selection and qualification, product design and development, manufacture and process certification, testing both non-destructive and destructive
- We consult on new product introduction and product and process improvement and optimisation.

Specialities

POLYURETHANES: Additives & property modification, analysis, materials selection, product design, product engineering, tool design and sourcing, material development, fine tuning of thermoset polyurethanes. Equipment, foam moulding, health and safety and training, quality assurance, thermoset pouring and injection. Finishing and decorating, testing. Marketing and market research.

Automotive, biomedical, general products, furniture, shoe industry.
Literature and patent search, project management, training, trouble shooting.

ALEA is dedicated to POLYURETHANES and guarantees to its customers consultancy and support during all the stages of the production processes:

- Start-up and fine tuning of productions related to polyurethane articles.
- Development and fine tuning of PUR systems.
- Commercial distribution (equipment, chemicals, tools).

Specialities

Materials, Business improvement, Environmental, Market research, Technology transfer, Packaging, Foam, Surveillance of new products, processes and technology, Mergers and Acquisitions.

Edwin G Fisher Associates is a long established consultancy to the plastics and rubber industry. The consultancy's strength is in the area of business strategy. The organisation offers assistance in techno-economic studies, marketing, market research, diversification, new product and technology searches, feasibility studies, acquisition studies and licensing. Particular experience is available in plastics, polymers, elastomers, paints, chemicals and packaging. The consultancy assists clients with the development of their business activities by offering services tailored to meet specific requirements and budget considerations whilst gaining maximum effectiveness by close co-operation.

Services provided include:

- Market research and forecasting.
- Business strategy.
- New product surveillance.
- Future trend analysis.
- Plastic packaging.
- Feasibility studies.

Since it was founded the organisation has worked with corporations world-wide.

Specialities

Extrusion sector of the plastics industry with a real focus on troubleshooting, process design and improvement, mentoring and development of staff.

- Business Turnaround / migration of products.
- Budgeting & Cost Control.
- Excellent Polymer knowledge base.
- Project / Programme Controllershship.
- Process / System Optimisation.
- Total Quality Management.
- Motivational Leadership.
- Product Development.
- In depth knowledge of extrusion processes and techniques.
